

# Kyle Kinkade

## CPO & Founder | Product Executive in AI, Spatial Computing & XR | Inventor

I specialize in turning emerging technologies and products and experiences. With a background spanning 20+ years, 6 Patents, and 1 Billion+ app downloads, I bridge the gap between engineering and User Experience. My career is defined by being early to platform shifts: Mobile (2008), Wearables (2012), AR/XR (2016), and Agentic AI (2025).

## Core Competencies

- **Leadership:** Product strategy, Go-to-Market, user experience, emerging technologies, team building.
  - **Technical Stack:** Agentic AI, Rust, Python, Swift, embedded devices, mobile and spatial computing.
  - **Domain Expertise:** Product Architecture, Design, consumer products, mobile ecosystems.
- 

## Professional Experience

### Founder | Weave Platforms

*Seattle, WA | 2024 – Present A privacy-first agentic AI platform that runs LLMs locally on-device*

- Developed a rust-based agentic environment that orchestrates workflows between local compute (Rust-based core) and cloud resources, optimizing for performance and privacy.
- Aimed for “Prosumer” and enterprise sectors, focusing on a “Local-First” value proposition that returns data ownership to the user.
- Developed “Conversational Programming”, a low-code framework allowing non-technical users to build and customize complex AI agents simply by talking to their desktop persona conversationally.

### Chief Product Officer | MIRIS

*Los Angeles, CA (Remote) | 2022 – 2024 MIRIS is the world’s first Spatial Content Delivery Network (CDN).*

- Led the vision for “Spatial Streaming,” enabling real-time streaming of high-fidelity volumetric content to devices (Apple Vision Pro, Meta Quest, mobile) without local downloads.
- Led a technical team of over 20+ developers to identify patentable technology that can stream at scale.
- Played a key executive role in positioning the company for its \$26M Seed round, aligning the product roadmap with investor due diligence.
- Envisioned the “build once, stream anywhere” ecosystem, for multi-modal consumption

### Chief Experience Officer | Integral Reality Labs

*San Francisco, CA (Remote) | 2020 – 2022 Integral Reality Labs builds blockchain-enabled physical gaming.*

- Built out an integral reality-based platform, creating robotics and AR based experiences using 3D printing, IoT, mobile, and AR/XR.
- Created user journeys bridging physical smart-toys (RFID-enabled) with immutable digital assets (NFTs) and game engines.
- Led R&D teams to develop prototypes for cross-displine based challenges.

### Founder & CEO | Monocle Society

*Seattle, WA | 2011 – 2020 Award-winning product studio specializing in Mobile, AR/VR, IoT.*

- Founded and scaled a studio that focused on bridging physical and digital into a single product.
- Created transmedia games Weave Storyteller and Goldieblox and the Movie Machine, both distributed to big box stores across the US.
- Partnered with Synapse Product Development for brands including Nike, Uber on devices like. Partnered with Starbucks on app.
- Awarded the Magic Leap Independent Creator Grant, validating the studio’s leadership in AR/VR.

## Founder & CEO | Monster Costume Inc.

*Seattle, WA | 2009 – 2012*

- Established and grew relationship with Big Fish Games, making several of their most known games available to iOS.
- Bootstrapped and launched Bartleby's Book of Buttons, received Apple's "App of the Week" as part of their iPhone Launch marketing.
- Acquired by private equity in 2012.

## Product & User Experience | Tapulous

*Palo Alto, CA | 2008 – 2009 Tapulous was the premier mobile social gaming company of the early App Store era.*

- Worked with original iPhone jailbreak pioneers to professionalize the hit title Tap Tap Revenge.
- Collaborated with artists and developers to work on UI/UX, gameplay, and core branding for the franchise.
- Helped drive the franchise to 450M+ downloads, prior to acquisition by The Walt Disney Company.

## Director of Development, Consumer | Getty Images

*Seattle, WA | 2008 – 2009* \* Rapidly promoted from developer to Director of consumer development in under 12 months. \* Prototyped a multi-touch interface using internal APIs, leading to the creation of Getty's first Mobile Division. \* Led development and shipping of Getty's first consumer iOS application.

## Early Career (Microsoft & Gates Foundation)

*Redmond/Seattle, WA | 2002 – 2007*

- **Microsoft (2005-2007):** Engineered test infrastructure for Business Intelligence (BI) analytics, specifically validating Multidimensional Expressions (MDX) integrations between BizTalk Server and Microsoft Excel.
- **Bill & Melinda Gates Foundation (2004-2005):** SDET for the Foundation's proprietary grant management system, the critical internal infrastructure used to structure and disperse billions in philanthropic capital.
- **Microsoft (2002-2004):** SDET for Combat Flight Simulator 3, before moving to Windows Sustained Engineering to develop the validation tools used to ship security patches.

---

## Patents & Intellectual Property

*Issued multiple U.S. patents defining core technologies in Spatial Computing and UX.*

- **True Three-Dimensional Streaming (US 12,198,244):** Architecture for real-time volumetric content delivery.
- **Eye Focus UX (US 11,816,262 & 12,141,354):** Biometric UI modification based on user gaze and focal depth.
- **Multi-Modality Interactions (US 11,768,581):** Frameworks for simultaneous voice, gaze, and gesture control.
- **Haptic Feedback (US 12,197,650):** Generating precise tactile feedback from 3D point cloud data.
- **Generative Drawing (US 12,223,614):** Systems for creating 3D objects in space using gestures.
- **Phygital Integration (US Pending):** RFID-enabled physical figurines connecting to digital assets.

---

## Education

**Bellevue College** | Computer Science
